Comments:		

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown
Comments: Secondary Contact Recreation was observed

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The UAA was conducted in May, 2005, and no WBCR was observed. The stream met the maximum depth criterion in 2 out of 8 sites and the average depth criterion in 2 out of 8 sites evaluated. There were several fisherman towards the mouth which ends at a lake. Because of the overall depth of the stream towards the mouth, the committee recommends retaining the WBCR designation below Highway H and removing the WBCR above Highway H.

Committee Recommendation: ☐ Retain Use ☒ Modify Use ☐ Remove Use ☐ Inconclusive
